## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-6, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Naruoka et al (4830517).

Figure 13 shows a connecting rod 2 comprising roller member 12, a locking/stop mechanism 22, a first portion at 4, and second portion near 88.

### ***Response to Arguments***

Applicant's arguments filed 4/26/05 with respect to claims 4-6 and 9 have been fully considered but they are not persuasive. The applicants argue that Naruoka et al does not change the position of the connecting rod with respect to the crankshaft. The examiner agrees; however, this argument is not germane to the claims. The applicants argue that element 12 is not a roller, but a bushing. The examiner contends that the applicant is imputing more limitations to "roller member" than is warranted. Element 12 is deemed a roller in so far as it turns/rolls.

### ***Allowable Subject Matter***

Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-3 and 10-23 are allowed.
